DETAILED ACTION

Claims 1-22 are pending in the instant application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, 16-19, 22, drawn to an isolated and/or recombinant nucleotide sequence enabling a cell cycle dependent initiation of translation of mRNA, a chimeric gene, a vector, a eukaryotic host cell, and a method for cap-independent translation of mRNA in a cell, classified in class 536, subclass 23.1.
- II. Claims 20, 21, drawn to a pharmaceutical composition for treating and/or preventing a disease in a subject by gene therapy and a method of treating a disease in a subject, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Invention I is directed to an isolated nucleic acid molecule and the method of using it in cap-independent translation of mRNA, while Invention II is directed to gene therapy using a pharmaceutical composition for treating and/or preventing a disease in a subject.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product of Invention I

can be used in the method of Invention I, which is cap-independent translation of mRNA in a cell. The method of Invention I is materially different from the method of Invention II. The two methods require materially different protocols and are distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
